Creating Durable URLs with Films On Demand

1. Search for and display the full record for the item desired. Do not copy the URL from the browser as this is session specific and the article cannot be retraced this way. Click on the “Details” tab to the left under the video screen.

2. Once you have located the document URL, copy and paste it into Blackboard. Films On Demand includes the EZProxy prefix so the URL is complete as shown.

3. An example of a complete article link looks like:

4. Once created, the student will be able to click on the link in Blackboard and be immediately taken to the item, whether an article, video, or database. They will not need to log-in again in order to access the Library webpage or other resources.
